- Cup warmer
- Ergonomic in day-by-day operations
- Pannarello to froth milk as you like
- Tip Ring

Easy to clean and maintain

- Automatic cleaning and de-scaling
- Removable brewing group

Saeco

Highlights

Autocleaning and de-scaling

Easy to use includes easy maintainance: Thanks to the automatic cleaning and de-scaling cycles, you are guaranteed perfect enjoyment every day and maximum longevity for your machine.

Cup warmer

This feature allows you to not only store your cups and glasses right on the machine, it also pre-heats them letting the aroma unfold even better and guaranteeing a long-lasting crema

Removable brewing group

The brewing group is at the heart of every fully automatic coffee machine and it should always be kept clean. A task that doesn't get any more convenient than with a Saeco: remove, rinse and re-insert – finished.

Touch lift

Patented electronically adjustable drip tray to fit every cup size

Ergonomy

Saeco is a synonym for convenience: refilling beans or water, emptying the coffee-dump box or the drip tray, all compartments are directly accessible.

Pannarello

With the pannarello you can froth your milk exactly according to your preferences. Just dip the pannarello in the milk, while slowly stirring the milk with a rotary movement. Froth the milk as long as you want for more or less foamy mikfroth.

Coffe Customization

With Saeco you can always easily select the coffee length, intensity, temperature and strength you prefer. Your personal settings are memorized so you can enjoy your favourite coffee at the touch of a button.

SBS (Saeco brewing system)

Saeco exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.

Tip Ring

Tip Ring with digital dispaly interface
